BMCASE CASE MANAGEMENT

CLIENT MANAGEMENT SOLUTIONS FOR HEALTH AND HUMAN SERVICES

SOFTWARE FOR
BEHAVIORAL HEALTH PROFESSIONALS

BMCASE© Case Management software offers you fast and accurate behavioral health clinical documentation with it's comprehensive and easy-to-use Practice Management and Electronic Health Record keeping for clinical decisions and clarified communication between clinicians.

Whether your practice is small with one or two therapists or larger with ten or more, BMCASE© will provide and assist you with a set of convenient, easy-to-use and comprehensive tools to allow you to focus on the important area of caring for your clients.

BMCASE© is a fully integrated client information solution consisting of a consolidated group of applications that provide easy and intuitive access to the patient's electronic treatment record through a single interface.

The complete software and database are installed directly on your computer or server. You control who has access to the software and data through our password secured system.

We have included a set of full function assessments and audits that may be all you ever need but if you want to add your own audits and questionnaires we supply you with an easy to use custom audit builder complete with scoring. You can specify these audits as intakes or follow-ups and they automatically appear on your selection menus for you.

* Custom Problem, Goal and Strategy set-up for Treatment Planning
* Computerized Scheduling
* Improves HIPAA Compliance
* Affordable Pricing

Benefits

Save Time And Money

BMCASE saves time by streamlining record keeping and saves money by eliminating paper and printing costs, while reducing time spent by staff in filing, searching for and maintaining records. Using our multiple search and select method enables quick and easy access to case information. Our customers indicate that they can locate client files in seconds, saving time and money. Case information is always available for viewing or reporting, even if someone else is currently modifying case information.

Standard Procedures

BMCASE© will help case managers follow a process and has been especially useful for new companies in providing a framework for new case managers. The use of standard templates in assessments documentation also assists in providing consistent standards for all outgoing correspondence.

Minimal typing

BMCASE© stores client information and auto populates forms with appropriate client data through out the software. BMCASE eliminates the need to write a client's name and other repetitive information on forms by quickly doing it for you.

Reduce Paper Work

It won't be long before facilities will be required to maintain electronic records to maintain compliance. BMCASE enables you to switch to and maintain client data in electronic format easily.

Security

Each user has their own security profile to use the software and control what information they can access. Access rights can be limited to read only or modify and access to certain tabs can also be limited.

Research

BMCASE can assist you in gathering collated statistics to better serve your clients. Organize data statistics such as Case Load percentages by gender, age, race, type of diagnosis, and more for example.
